### Teknik Tavsiyeler / Technical Advice

Taşın kalitesi tezgahın motor gücüne ve merdanenin malzemesine bağlıdır. Genelde ikili taş, tekli taşa göre daha yumuşak kalite gerektirir. Yumuşak kalitede taş ise sert malzemeye uygundur.

*The grade of the wheel depends on the horsepower of the machine and the material being ground. In general, dual wheel grinders require softer grades than single wheel rinders. A soft grade wheel requires hard materials than soft materials.*
