HELİSEL FREZELER/ HELICAL MILLING CUTTERS

Önerilen kesme koşulları her zaman genel koşulları ifade eder. Bu kesme koşulları; makine rijitliği, kullanılan takım, iş parçasının bağlanma şekli ve soğutma sıvısına göre pratikte ayarlanmalıdır. Ortalama talaş kalınlığı (hm) = fz x sin(kr).

*The recommended cutting conditions always refer to general conditions. These cutting conditions should be adjusted according to the practical machine rigidity, tools, workpiece clamping and coolant. Average chip thickness (hm)=fz x sinkr.
