5 Cutting Edge Length

S P K R 12 03 ED08 S R - NN

Metric System

Inch System

The value to be used for cutting inserts with an inscribed circle smaller than 1/4" (1/32" to 1/4").

The value to be used for cutting inserts with an inscribed circle larger than 1/4" (1/8" to 1/4").

* In addition to round inserts, equilateral quadrilateral and rectangular cutting inserts provide a longer cutting edge.

Milling

MILLING GRADES

Grade	ISO	Coating	Stock availability	Features
TC0135	P35	CVD	△	CVD coated grade for high speed milling of steel. It combines good wear resistance and toughness to avoid chipping and edge breakage. Can be used in both wet and dry conditions.
TC0140	P40	CVD	△	Suitable for large depth of cut, medium to high speed milling of steel under unstable cutting conditions.
TC2215	K15	CVD	●	CVD coated grade for high speed milling of cast iron. Suitable for higher cutting parameters and ensures stable performance and reliability. Can be used from finish, semi-finish to rough milling.
TC2225	K25	CVD	○	Suitable for semi-finish milling and rough milling of gray cast iron at medium and high cutting speed. Recommended for dry cutting conditions to achieve longer tool life.
TP2125	P25 M25	PVD	●	First choice for steel milling. It is recommended to be used in rough to finish machining of steel under stable working conditions, good for both dry and wet machining with small cutting width, complex tool path and adhesive materials.
TP2135	P35 M35	PVD	○	Supplementary grade to TP2125 with medium hardness substrate when high toughness is required.
TP2335	M35	PVD	○	Suitable for milling stainless steel and steel at medium and low speed under unstable machining conditions.
TP2345	P35 M35	PVD	○	Ultra-thick PVD coated grade is the first choice for stainless steel milling. It is suitable for rough milling of stainless steel under unstable machining conditions.
TP2225	K25	PVD	○	Suitable for semi-finish and rough milling of gray cast iron and nodular cast iron at medium and low cutting speed. Has excellent tool life under both dry and wet conditions.

MILLING GRADES

Grade	ISO	Coating	Stock availability	Features
TP4415	S15	PVD	●	Carbide substrate has both toughness and high hot hardness characteristics and is suitable for rough milling of stainless steel under unstable machining conditions. Milling at low cutting speed can achieve longer tool life.
TP4405	H15	PVD	△	Produced-per-order grade, suitable for milling hardened steel. Can be used in rough and finish milling, Milling the needs of most conditions.
TP2620	P20 M20 K20 S15 H15	PVD	●	Universal grade with excellent wear resistance and stability. Suitable for milling of steel, stainless steel and cast iron. Also applicable for semi-finishing of superalloys and semi-finish milling of HRC45-55 hardened materials.
TP2630 TP4630	P30 M30 K40 S25 H25	PVD	●	Universal grade applicable for rough, semi-finish and light interrupted milling of steel and stainless steel.
TP2640	P45 M45 K45 S25 H25	PVD	△	Supplementary grade to TP2630 when high toughness is required.
TP2320 TP1320	P20 M20	PVD	●	Submicron grade with excellent wear resistance and toughness, first choice for continuous milling of stainless steel. Also works well for general machining of steel.
TN7501	N15	-	●	Uncoated grade combined with sharp cutting edge, used in aluminum alloy milling.
